

ARCHITECTURE AUDIT (Phase-1)

Context:

- Phase-1 is offline-only runtime, CI/type-safety/logging stubs are in scope.
- No provider calls; deterministic tests.

Plan from ChatGPT 5:

[View Phase 1 Plans within the Phase 1 folder in the Orchestration build folder]

Claude — return **only**:

- 1) Ambiguities to fix (bullet list)
- 2) Edge cases we missed (bullet list)
- 3) 2 design improvements (perf/security/maintainability)
- 4) **Codex-ready spec**:
 - Files to touch (paths)
 - Contracts (types, inputs/outputs)
 - Edge cases (explicit)
 - Test scenarios (vittest)
 - Non-goals (what we are NOT doing)

Tone: crisp, no code unless critical to disambiguate a contract.
